

Access to >100 Million Lives in Europe

Certara Evidence & Access Real World Data Solutions

Prior to August 2017, there were only a few data sources that were easily accessible in Europe. All of these data are relatively small (approx. 5-7 million) and primary care-based databases.

Since August 2017, the French agency has made the French national healthcare systems database—SNDS data—accessible to private organisations (pharmaceutical companies need to access the data via a certified third-party), and this does not have to be through academic affiliations or following a request from an agency (EMA, HAS etc.). The access request now is required to demonstrate a scientific or medical research need rather than affiliations or requests from agencies.

Certara Evidence & Access is proud to be the first successful non-academic applicant to get a positive response towards SNDS data access. We have been partnering with many industry clients as a pioneer to access the new SNDS data. Combined with our own ANSER Real World Data Sets and other databases in Europe, this offers a combined population of more than 100 million lives in Europe.

Selected Experience with Specialized EU Datasets

SNDS (France)

65 million lives

CPRD (UK)

5-7 million lives

German Sickness Fund

5-7 million lives

Nordics Databases

15 million lives

Hungary

9 million lives

SNDS

The SNDS data have the following characteristics:

- 1. 65 million lives
- 2. Data for 10 years is available
- 3. Anonymised data on:
- Socio-demographics
- Medical
- Characteristics
- Ambulatory care
- Hospitalizations
- Diagnosis

- Drugs and procedures
- Mortality data
- Costs data

The SNDS data can be extremely powerful as the database size is very large and representative of the French population, even for extremely rare diseases/ presentations. With a prevelance of <1 in 10,000 general population, the SNDS can provide sample sizes of >1,000.

THE FRENCH NATIONAL HEALTH DATA SYSTEM

AN AMALGAMATION OF THE FOLLOWING DATA

CNAM/SNIIRAM

Caisse Nationale d'Assurances Maladie/ Système National d'Information Interrégimes Assurance Maladie

PMSI

Programme de médicalisation des systèmes d'information

INSERM: CepiDC

Institut National de la Santé et de la Recherche Médicale

SNDS

Système National des Données de Santé

EGB

Echantillon Général des Bénéficiaires

Main National Health Insurance

[~65,000,000 patients]

- Ambulatory care data
- Diagnosis for chronic disease

Hospitalization data

[all French Hospitalized Patients]

- Hospital Discharge Diagnoses Database
- CESP: Vital status

- CNAM/SNIIRAM [all beneficiaries]
- PMSI
- CepiDC

Sample of the CNAM beneficiaries

[~670,000 patients]

- Outpatients claim database
- Inpatients claim database

Linked datasets can be accessed by private research organisations such as Certara Evidence & Access.

Since 2017, [...] the collaboration with Certara's dynamic team has always been constructive and positive, resulting in the signature of a multitude of contracts governing the provision of SNDS data for the realization of various studies in the field of health.

—**Julius Kemme**, French Health Insurance (CNAM, SNDS data owner)

WHY CHOOSE CERTARA EVIDENCE & ACCESS TO GET ACCESS TO THE DATA?

- **Obtain more than access to data** from niche needs identification, justifying access, differentiating value, quantifying an opportunity, to demonstrating benefit/risk, Certara offers real world data solutions for every need.
- Leverage our in-depth knowledge of the French context and more than 15 years of experience conducting observational studies in France.
- Our team of epidemiologists, statisticians and real world data specialists provide expert analysis and study design services that leverage data for various international markets.

About Certara

At Certara, we accelerate medicines to patients, partnering with life science innovators. Together we advance modern drug development with biosimulation, regulatory science, and market access solutions.
